

IDEAS

Map

Scatter plot

Pie/Donut

→ each slice = heritage type
→ size of slice = proportion that is of that type

(stacked) Bar

→ colour = type of heritage

Treemap

COMBINE & REFINE

↳ tooltip applies to map

↳ hover over a point to see the school name(s) & address, item

FILTER

Map

Scatter plot

Tree map

CATEGORISE

- Showing locations quickly:
→ Map → shows where on the map the site/item is
- Comparisons:
→ scatter plot → see which sites are more significant
→ Stacked bar → side by side comparisons of which suburbs have more sites
→ pie chart → shows proportions
→ treemap → also shows relative sizes by no. of sites/items

QUESTION

- 1) Are the idioms intuitive?
- 2) Is the dataset represented cleanly?
- 3) How easy is it to see more detail?
- 4) What information should be shown to be useful?
- 5) How can information from each column be used in conjunction with others?

LAYOUT

TITLE: NSW GOV. SCHOOLS W/ HERITAGE BUILDINGS / ITEMS
META DATA
source: link to data source

Text: more info. about the topic/provide context

- significance
- 1
 - 2
 - 3
 - 4
 - 5
 - 6
 - 7
 - 8
 - 9
 - 10

Text: What points are interesting/standout on the map

Sub heading: Proportion of heritage types

No. of heritage sites in NSW government schools per suburb

FOCUS

hover: info. about that site/item:

- ↳ type
- ↳ significance
- ↳ school name item
- ↳ address
- ↳ local gov.

For each suburb (colour):
→ size = no. of that type
→ hover for tooltip

List of sites of this type

TITLE: Initial Visualisation
AUTHOR: Jasmine See

DATE: 10/09/2024

SHEET: 2

TASK: Rough initial idea for the webpage

OPERATIONS

- Click on points on the map to filter which points to display
- Hover over a point for info. about that site/location
- Hover
• Click on one tile in the tree - map to see a list.
 - ↳ total count
 - ↳ school name
 - ↳ item name
 - ↳ address

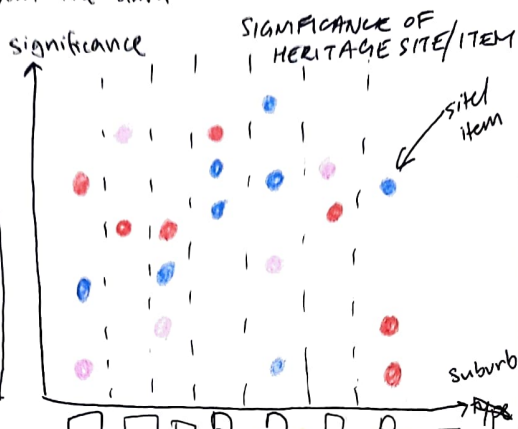

DISCUSSIONS

- Easy-to-follow magazine-style structure
- As the user goes down the page, more detailed charts
- May result in a very long webpage that requires lots of vertical scrolling
- Not as convenient if all data wants to be viewed at a glance

LAYOUT

TITLE:

Text: More info/context about the data

No. of heritage sites in NSW Gov. schools by suburb

Text: Explaining interesting points of data that may be of note

Metadata: Author:

Date:

Source:

etc.

TITLE: Compact Visualisation

AUTHOR: Jasmine See

DATE: 10/09/2024

SHEET: 3

TASK: Present all data in one page w/ minimal scrolling

OPERATIONS

- Click on map points to filter
- Hover on map points for more info about that site
- Buttons for the scatter plot to choose which suburb's data to display/hide to make reading graph easier
- Hover over a tile in treemap for more info
 - ↳ list of heritage items & count for that tile (which is a category of suburb + heritage ~~type~~ type).

FOCUS

TOOLTIP/Pop-up:

↳ item name

↳ type

↳ significance

↳ address

→ colour = heritage type

→ position = which suburb item ~~is in~~ it belongs to

button to display/
hide suburb

DISCUSSIONS

- Very cluttered
- Too much information in too little space
- Scrolling is minimised, but at the cost of data being too small & may be hard to interpret/read.

LAYOUT

TITLE

Text: provide more info.

Significance

- 0
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10

Suburb

No. of heritage sites in each suburb

INFORMATION:

→ info for each section can be displayed here for details.

INFORMATION:

→ info / list for each the tile can be displayed here

TITLE: Partitioned layout

AUTHOR: Jasmine See

DATE: 10/09/2024

SHEET: 4

TASK: Webpage is neatly divided into sections for different charts.

OPERATIONS

- Click on point on map to filter
↳ only display that type
- Hover over map point for info. regarding that specific site
- Tree map tile - ~~hover~~ click to see text displayed under the chart
↳ info about that tile hidden by default
- Click on a segment of the stacked bar chart for information to be displayed as text (list)

FOCUS

Suburb

→ colour = heritage type

INFORMATION:

• list of the item names in that segment (category) will be shown here when segment is clicked on

hidden by default

list only on screen when a segment is clicked from the stacked bar chart

DISCUSSIONS

- A lot of information/data is needlessly repeated
- Clear hierarchy for eyes to naturally follow
↓
- Charts are separated neatly to make layout cleaner

LAYOUT

TITLE (centred)

1. Map of Sites

Text to explain the map here
↳ colour = type, size = sig.
↳ filter by endorsed sig. to prevent clusters

2. Endorsed Sig. of Sites

Text here to explain how chart works

Show All

3. No. of Heritage Types per. ~~School~~ ^{Suburb} ~~Suburb~~

Text to explain chart & data

FOCUS

select heritage type to show data for

count of each type for that school

School 1

default is all schools of that suburb, can choose a certain school

TITLE: Final Webpage Design
AUTHOR: Jasmine See
DATE: 11/09/2024
SHEET: 5
TASK: Final Design

OPERATIONS

- Click on a map point to display only sites/items of the same type
- Slider on map to filter by endorsed significance
- Drop-down menu for stacked bar chart to show count of endorsed sig. for a heritage type
- To simplify the data, only top 3 schools in the suburbs w/ heritage sites will be used for pie chart
- Drop-down menu for selecting a specific school

DISCUSSIONS/DETAILS

- Magazine-style, easy to read / follow from top to bottom
- Data for different fields are displayed & broken down into details
- Aligned in ~~left~~ ^{centre} to naturally follow sight line
- Potentially low data-ink ratio & lots of white space may be ~~more~~ present
